From humble beginnings to impactful collaborations with nationalized entities, corporate entities and many more our journey is defined by relentless growth and promising prospects. Our innovative and exemplary business ethics propel us to great heights of success. Mauli Infotech (OPC) Pvt Ltd, proud to announce a ISO 27001:2013 certified entity. We're committed to quality, adhering to international standards and investing in our team's continuous development.

What Makes Our IT Services Distinct

- | Proven expertise team of 17+ years' experience in managed services and consulting services.
- | Our IT services and support save your money and time, letting you focus on your core business.
- | Satisfied customers promote our brand through genuine word-of-mouth endorsements.
- | 24X7 Live chat support.

Our Services

1 - Automation Expertise:

Mauli Infotech (OPC) Pvt. Ltd. has very good control in providing automation solutions for customers to handle operational environments with less downtime and error free. With the help of automation tools like Rundeck / Ansible Mauli team provides automation for Database Patching, Software Installations, query optimization, DR drills etc. Mauli has around 5 years of experience of Automation in operational environments specially for banking customers.

2 - Database Managed Services

At Mauli-Infotech, we're your partners in database management mastery, ensuring seamless installation and configuration, peak performance optimization, scalability, and resilience across Oracle, Postgres, MS-SQL, and MySQL realms. From dynamic clustering to resilient disaster-proof database configurations, our expertise encompasses continuous support, meticulous performance tuning, seamless version upgrades, and proficient database migrations.

3 - Middleware Managed services

In today's digital world, applications are essential for running businesses smoothly and driving growth. Our Middleware Managed Services make it easy for you. We take care of everything from getting your applications up and running to keeping them working perfectly. Our team keeps an eye on things round-the-clock, fixing any issues before they cause problems.

4 - Customized Application Development

Businesses are increasingly turning to software to enhance efficiency and profitability. Customized software, tailored to specific needs, is vital for success. Mauli Infotech excels at this by thoroughly understanding customer requirements, creating prototypes for approval, and delivering personalized solutions.

5 - Android & IOS App Development

We specialize in Android app development, offering top-tier solutions with intuitive designs and smooth user experiences. Our seasoned developers rigorously test apps across various devices to ensure flawless performance. Collaborating closely with clients, we transform their visions into innovative and error-free mobile applications

6 - Support Services – Application/ System

Our professional support services encompass a range of critical tasks including OS Installation, Firmware upgradation, Basic hardware replacement, Cluster configuration, Volume and Backup management. With 24x7 operations support from our experienced engineers, we ensure seamless assistance to achieve our clients' digital aspirations.

7 - On-Site Resource Services

Technology is integral to business strategy, aligning IT and business goals seamlessly. On Site acts as a value-driven partner, offering on-site resource services to enhance client experiences and streamline operations. With our dedicated support, we ensure a seamless and efficient working environment for our clients' businesses.

● Resources we provide for Administration

Our value-driven Onsite approach ensures seamless integration and innovation to propel your business forward. We provide categorized expert resources for our professional services such as

Administration Resources

Net backup, Storage Admin
Database (Oracle DBA / MySQL DBA / NoSQL and Cassandra DBA)
Operating system (Linux / IBM / HP-UX and Solaris)
Middleware (JBoss / Tomcat / WebLogic),
Cloud DBA (Oracle cloud DBA / MySQL cloud DBA)
Azure / Windows / VMWare and Citrix Admin.

Development Resources

Java | .Net | C# | PYTHON | PHP | HTML | CSS | Angula | React | Flutter

SOME OF OUR KEY PROJECTS

1- Project Name – mysql Database upgradation and migration

Client Name : Globtiter Infotech Pvt. Ltd
End Customer : LIC Of India, Santacruz West, Mumbai - 400054
Duration : Jan 2022 to June 2023
Technology : mysql

Details :

- | Setup POC Environment with MySQL 5.6 + RHEL 7.9 to upgrade and migrate to MySQL 8.0.25 + RHEL 8.4.
- | Get this entire process approved by Oracle and after that implemented in approximately 143 divisions with minimum downtime. (including DR implemented this on 572 live servers and 10 UAT servers)
- | After upgradation, migration and configuring replication validation of migrated data done successfully with different approaches.
- | Prepared hardening process for same and implemented on all servers.

2- Project Name - Datacentre (DC) Migration

Client Name : Fidelis Technology Services Private Limited
End Customer : Bank Of Baroda
Duration : March 2023 to till date.

Details :

- | Installation of 1000+ infrastructure devices (Network Routers, Firewall, Switches, Servers, Storage, Tape Library).
- | Integration of new network equipment's and storage procured by Bank for New DC or Identified for interim solution.
- | Deployment of Swing Hardware (Routers, Firewalls, Blade Enclosures and Servers, Storage) for interim solution.
- | Network cabling within the racks at New DC.
- | Datacentre applications migration- Detailed phase wise application / Infra migration plan to be submitted.
- | Free up enclosures in the existing DC, by consolidating the servers & redeploy in the in the new DC with Blade SAN switches / Virtual connect.
- | Storage data replication and restoration for Finacle and its associated applications

● Some of our KEY Projects

3 - Project Name – Database and OS support services

Client Name : 3i Infotech
End Customer : IOCL (Indian Oil Corporation Limited)
Duration : August 2023 to till date
Technology : PostgreSQL, Oracle and Linux
Postgre SQL Database Support

Details :

- | Setup of PostgreSQL Bidirectional replication using PGD on PG15
- | Migration of data from single master PG13 to PGD PG15
- | Upgrading the Database from out of support version 9.6 to postgres 14,15
- | Setting up of monitoring tools like postgres enterprise monitoring (PEM)
- | Automation of pgbadger reports

Oracle Database Support Details –

- | Installation, configuration and upgrading of Oracle server software and related products.
- | Establish and maintain sound backup and recovery policies and procedures.
- | Working on scripts for automation for backup, restore, database growth, OEM alert, kill session.
- | Supporting L1 team and Root Cause Analysis of their reported problems.

Linux support Details –

Technology :

- 1 Red Hat Enterprise Linux 6, 7 and 8
- 2 Red Hat Satellite
- 3 Ansible Automation Platform

Details :

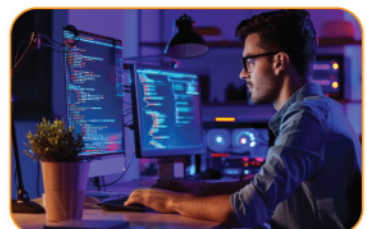

- 1 Migration of Red Hat 6 to 7 and 7 to 8.
- 2 Migration of Red Hat Satellite server to latest version.
- 3 Golden image creation for Red Hat 8.
- 4 Created playbook for hardening RHEL 8 as per CIS benchmark

4 - Project Name - P2V Migration

Client Name : Fidelis Corporate Solutions Pvt Ltd
End Customer : ICICI Prudential. Asset Management. Goregaon East, Mumbai
Duration : Jan 2024 to March 2024
Technology : Window, Linux to virtual , ESXI host

Details :

- | We had completed total 11 physical machines (9 Linux + 2 Windows)
- | We deployed all machines on ESXI host and done with all testing. IN this we had done with and without VMWare converter as well.
- | As for migrating physical to virtual we have handled 1TB to 4TB data which was stored on physical as it was same on virtual after the migrating process.

Some of our KEY Projects

5 - Project Name - Janseva Sahakari Bank Database Migration

Client Name : JansevaBank, Hadapsar, Pune.
End Customer : JansevaBank, Hadapsar, Pune.
Duration : December 2023 till date
Technology : Linux (Rhel 8.5) , Oracle 19c

Details :

The aim of this project is to migrate an existing database to a new environment while ensuring minimal downtime and maximum data integrity. The migration was executed using an active-passive cluster setup to maintain high availability and redundancy. As after migrating database to new environment monitoring and analysis query performance with query tuning to improve query performance and providing support to maintain all in synchronization.

- | Database assessment and infrastructure setup with pcs cluster.
- | Data migration strategy development and testing.
- | Failover, DR drill and redundancy testing, performance optimization.
- | Monitoring and alert setup, documentation, and training.
- | Worked on query analysis and optimization to enhance database performance.
- | Created and optimized indexes to improve query execution speed and efficiency.

6 - Project Name – Onsite support for Oracle database

Client Name : M/s. Joshua Infosys, Ghatkopar, Mumbai
End Customer : Bank Of Baroda
Duration : Oct 2020 to Feb 2022
Technology : Oracle

Details :

- | Installation, configuration and upgrading of Oracle server software.
- | Cross platform migrations
- | GoldenGate setup and configuration.
- | Configuring replication between production databases.
- | Taking care of Backup, recovery, restoration, patch management, version control, maintain users and roles, assign privileges), Plan growth and changes (capacity planning).
- | Application tuning and performance monitoring (Query tuning, index creation)
- | 24x7 support provided.
- | Interface with Oracle Corporation (SR) for technical support.
